- SES’ investment programme has a strong focus on growing market segments
- Yahsat 1A was launched successfully on 22 April 2011, some other launch shifts expected
- 12 satellites to be launched by end 2014, providing replacement and incremental capacity
- In 2011 growth capacity will come from Yahsat 1A, QuetzSat-1, SES-4 and SES-5
- In total 293 incremental transponders deliver over 23% additional capacity compared to 31 December 2010
- All infrastructure projects exceed IRR hurdle rate of 10-15%
Capex spending set to reduce

No change on CapEx spending schedule over period presented

- 2012 to 2016: CapEx spending significantly reduces as replacement cycle of the SES fleet nears its floor; the estimated, uncommitted replacement CapEx refers to SES WORLD SKIES satellites
- A balanced mixture of replacement and incremental capacity
- CapEx as proportion of revenue reduces from around 45% in 2010 to around 10-15% in 2014
- Not including further, potential investments in growth opportunities

Note: CapEx in graph is on cash basis; FX translation based on 1 EUR = 1.3294 USD (A 2010) and 1.35 (T 2011 - T 2016)

- The net interest expense is in line with the same quarter of 2010, reflecting the overall stability of the group’s debt structure.
- On the net foreign exchange result, gains of EUR 9.8 million were recorded in 2011, on the revaluation of certain operational intercompany balances and of currency holdings. In 2010, these revaluations, coupled with those of U.S. dollar-denominated liabilities, had led to the recognition of EUR 22.4 million loss.

- Net debt/EBITDA was 2.80 times at 31 March 2011.
Guidance

▲ All guidance issued with the FY 2010 results in February 2011 is reiterated
▲ SES expects recurring revenue growth of approximately 3% in 2011; recurring EBITDA growth is expected to be in line with the revenue growth
▲ Revenue will rise strongly thereafter benefiting from the full year impact of the new capacity launched in 2011
▲ The 3-year recurring revenue CAGR (2010-2012) remains unchanged at 4-5%
▲ SES' revenue growth does not develop on a linear basis. It depends on the timing of satellite launches and of the entry into service of a spacecraft, on the ending of customer contracts (e.g. German analogue transponders) and the timing of new agreements.
▲ Other key financial guidance (for 2011):
  • Recurring infrastructure EBITDA margin above 82%
  • Services activities EBITDA margin to be in a range of 14% to 18%
  • Reported tax rate in a range of 10% to 15%
  • Net Debt / EBITDA ratio will be managed below 3.3 times
  • Depreciation is expected in a range of EUR 460 – 480 million (@ 1.35 USD)
▲ This guidance excludes any impact of the organisational adaptation

Note: “Recurring” represents underlying revenue / EBITDA performance by removing currency exchange effects and eliminating one-time items
