

MARITIME+ SMALL VESSEL MANAGED SERVICE

AFFORDABLE CARIBBEAN CONNECTIVITY

Two global leaders have collaborated to deliver affordable, plug-and-play packages that combine an all-in-one terminal with wide beam and HTS satellite capacity designed specifically for the untapped small vessel connectivity market.

The small vessel market is an area of enormous global opportunity, including approximately 600,000 leisure and fishing vessels. Until now, they have faced high terminal and installation costs coupled with expensive air time rates.

Your customers want simple and affordable solutions for fast, reliable connectivity. SES and Gilat are working together to provide this – starting in the Caribbean.

A new collaboration bundles the Gilat MarineRay 60P all-in-one Ku-band maritime VSAT terminal with SES Maritime+ capacity on both wide beam and high throughput satellites (HTS) to help make high-speed Mbps connectivity accessible to more users at sea. This all-in-one solution will help you tap into an underserved market, combining three low cost packages with easy installation – three cords and no crane required – and simple, plug-and-play operation.

Gilat MarineRay 60P Terminal

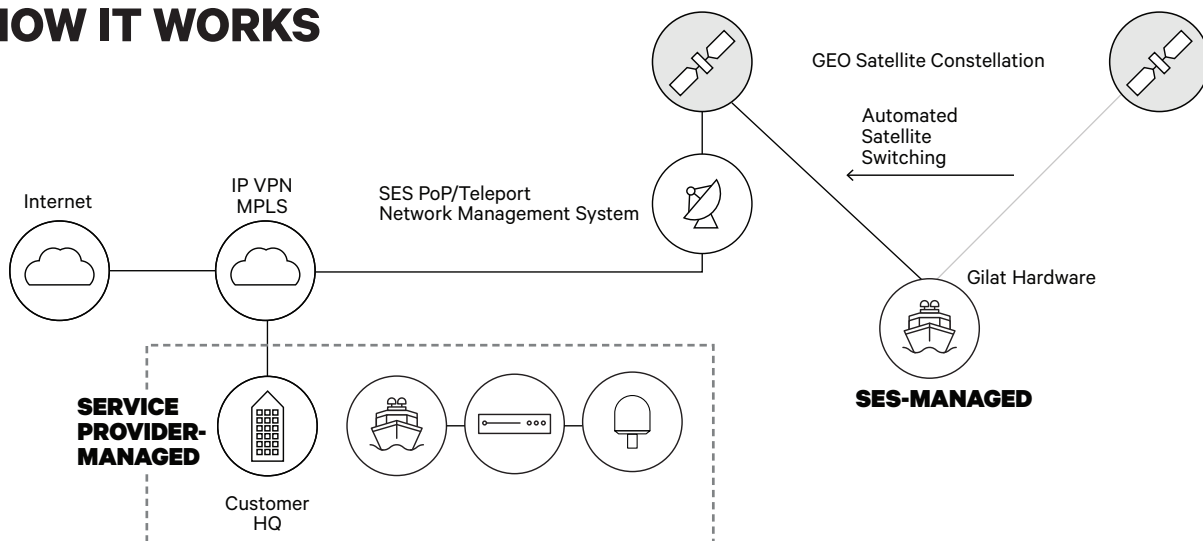

SES Maritime+ Connectivity Key Features and Benefits

- Unmatched maritime platform efficiency
- Access to increased data volumes
- Flexible service package options
- Easy to scale packages up or down
- Per terminal committed service levels
- Minimal capex investments
- Easy access with efficient, customer-centric resources management
- Well established dealer network
- Up to 120 Gbytes/Month

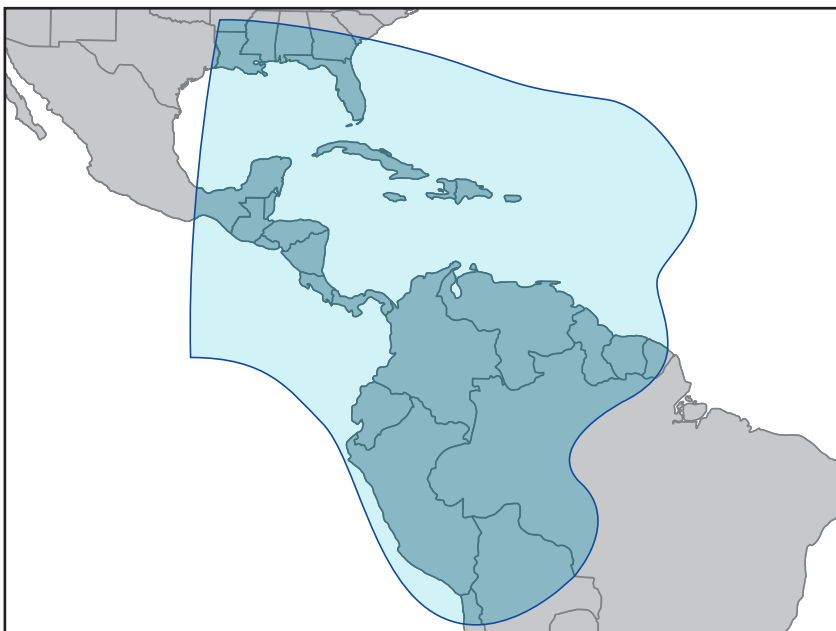

Gilat MarineRay 60P Terminal Key Features and Benefits

- All-In-One integrated maritime terminal
- Fast, easy plug and play installation – no crane required
- Low weight: 54 Kg
- 3-Axis control and stabilizer
- Automatic satellite acquisition
- High performance Capricorn modem/router
- Full Ku-band support

HOW IT WORKS
