

# NEW POSSIBILITIES IN LATIN AMERICA

## Your key to enabling seamless access to content and connectivity

SES-10 is our first satellite designed exclusively for Latin America. With more than 55 Ku-band transponders, SES-10 can deliver enhanced coverage and expansion capacity to serve the region...

## THROUGH SES-10,

BROADCASTERS AND SERVICE PROVIDERS CAN ALSO:

1

**Ensure extensive coverage** for direct-to-home (DTH) broadcasting and data connectivity services, from Mexico to Argentina

2

**Gain access to high-powered satellite capacity and media solutions** for pay-TV markets; the SES fleet currently broadcasts to 780 channels to 37 million homes across Latin America

3

**Enable reliable data network capabilities** to extend business reach and having the flexibility to allocate resources based on market needs
