

SHARE THE MOMENT

Global Occasional Use

CONNECTIVITY WITHOUT LIMITS

BRING YOUR CONTENT TO THE WORLD

When there are important news events, the Olympics or the FIFA World Cup, it's like the whole world is watching. Whether you need a short-term satellite connection to share your view of live, one-off sporting events, music concerts or scheduled events, or to cover the latest breaking news, we can help. Our satellite network covers 99% of the planet to ensure we provide the secure, customised connectivity you need to transmit SD, HD or Ultra HD video anywhere and anytime.

The world's leading broadcasters trust us to provide seamless point-to-point satellite links for contributing and distributing content from one location to

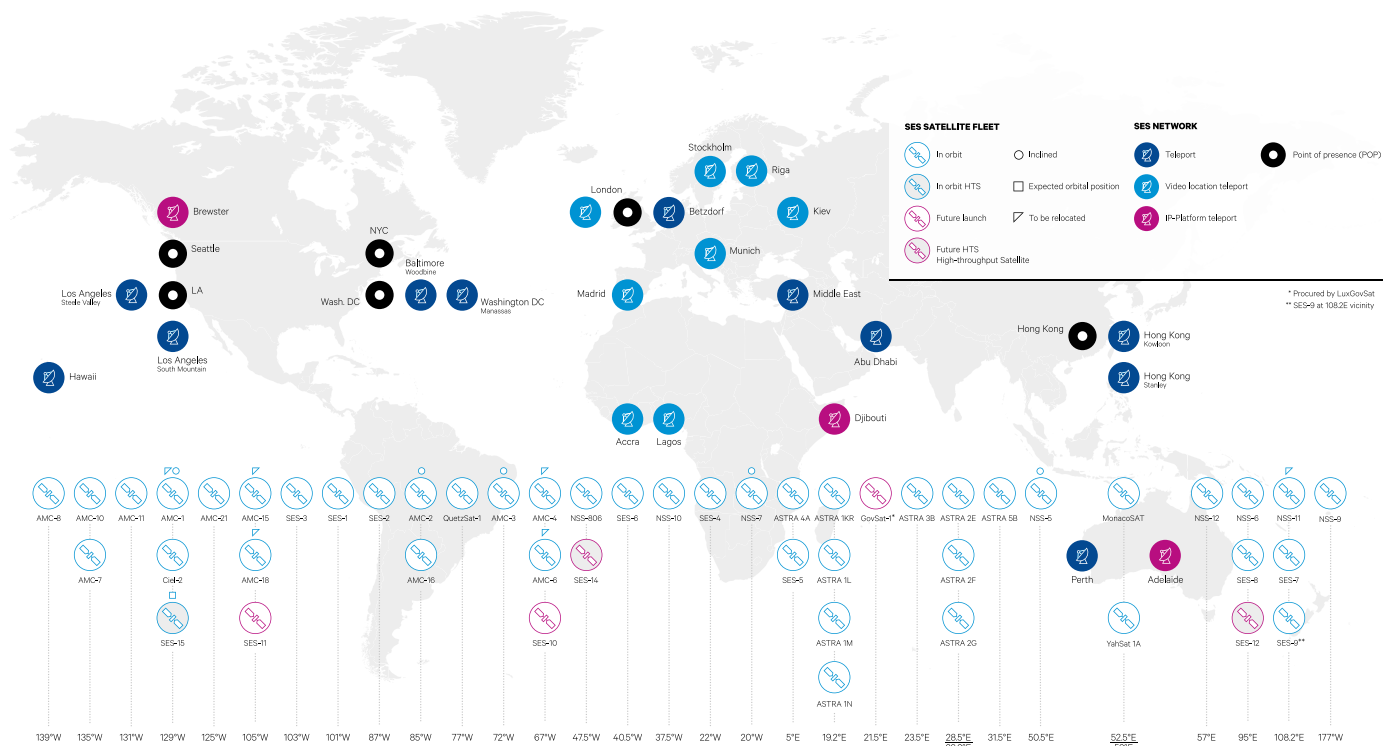

billions of viewers around the globe. Whether you're sending live coverage back to the studio for integration into your newscast, or contributing complete content to a teleport for the distribution of syndicated programming via satellite or other infrastructures, you can rely on us. Our services ensure your signals are distributed according to an optimised transmission scheme for both occasional use and full-time contribution.

Share the moment from your planned event or live coverage of sports, concerts, reality shows or breaking news via our occasional use satellite capacity.

YOU'LL BENEFIT FROM:

- Immediate delivery of robust satellite capacity
- Short-term capacity to broadcast from minutes to months
- The ability to transmit high-bandwidth content, including HD and Ultra HD
- Full package solutions including technical consulting services
- Vast uplink network
- Managed services
- Extremely reliable service from ground to satellite, satellite to ground
- Easy bundling with our teleport services
- Flexible online booking
- Worldwide coverage
- Global, 24/7 support

With tailored occasional use solutions, you can book broadband connectivity for video or data transmission from minutes to months – anywhere in the world

DATA TRANSMISSION VIA RELIABLE CONNECTIONS

More and more, modern life demands data connections in the world's most remote areas – on ships, in the air, or in foreign theatres for government operations.

Our global fleet of satellites helps to ensure your remote and unconnected facilities never feel detached. Whether you need to keep them connected to head office, or provide on-the-spot communications for large corporate events or special projects, we tailor our solutions to your particular project.

At sea, our satellites keep vessels connected to headquarters, ensure shipping vessels and super yachts have safe passage across the world's

oceans, and provide short-term, high-bandwidth data links where and when they're needed. In the air, airline passengers no longer want to disconnect from their friends and family while on a flight – even when crossing the Atlantic. We provide capacity that keeps passengers connected, and ensures airline maintenance crews can perform repairs when the aircraft is away from its hub.

Government staff on the ground often need to report to military bases or governmental offices from unconnected areas. We provide tailored connectivity solutions vital to ensuring your staff never feel isolated. Our on-the-spot communication

solutions for large-scale government and military projects ensure your signals are distributed according to an optimised transmission scheme for both short term and long-term occasional use.

YOUR BOOKING MADE EASY
