**Installation & Commissioning**

# ACCELERATE TIME-TO-MARKET

SES Networks leverages a proven methodology, and standardised procedures to ensure a right-first-time installation of equipment and commissioning of service. Getting the implementation right ensures issue-free maintenance which is especially important for remote locations.

Installation of equipment and commissioning of services puts SES Networks' customers into the heart of opportunity sooner. With a right-first time approach, positive outcomes are a given.

### Key Features

- Structured multiple phase approach to installation and commissioning
- Proven best practices and custom Methods of Procedures (MOPs) used ensure it's done right the first time
- Experienced onsite technicians supported by SES Networks Global Implementation team

### Benefits

- Timely installation and commissioning means accelerated time to market and revenue
- Reduce learning costs and lead-time to train internal staff for what is essentially a one-off event
- Control operational expenditure through quality driven implementation practices that minimise return site visits

# SES NETWORKS IMPLEMENT SERVICES

All SES Networks implement services process and methodologies are aimed at completing individual service components accurately, with quality and most important right-first-time without the need for revisits or additional maintenance work. A great deal of pre-work and equipment staging is performed prior to shipping enabling an accelerated and trouble-free install.

Site Survey Service streamlines installation with in-depth onsite analysis.

Meet your time-to-market, time-to-revenue objectives by adopting a 'right-first-time' approach with the Installation & Commissioning Service.

With Project Management Service you can benefit from having one 'conductor' to bring your project in on time, to budget and to agreed quality standards.

Lifecycle Services provide customers with a comprehensive range of end-to-end services to implement, manage and maintain networks, equipment and terminals for sustained up-time and system availability. Lifecycle Services accelerate time-to-service so customers can focus on their mission and bottom line, not the design, maintenance and operation of complex satellite and terrestrial networks around the world.

# SES NETWORKS TRAINING COURSES AVAILABLE

Explore new frontiers in learning to gain the technical skills and hands-on experience you need to thrive. Customers, partners, employees, and authorised professionals can take online and instructor-led courses taught by SES Networks technical experts. Students get practiecal, hands-on learning experiences to help them construct, troubleshoot, repair, and monitor and manage satellite ground systems and related network components for optimum network performance and uptime.

**SES Networks Ground Systems**

- O3b001: Tier-2 GD Field Level Practices
- O3b002: Maritime Systems Training
- O3b003: AvL Installation & Commissioning
- O3b004: ViaSat Tier-2 Operations & Maintenance

**SES Networks Online Training**

- O3b731: Introduction to SES Networks
- O3b732: Advanced System Fundamentals
- O3b733: Fixed Terminal Site Survey

**GVF Courses**
- GVF500: Introduction to Satellite Communications
- GVF510: Core Skills for VSAT Professionals
- GVF520: Satcom Fundamentals
- GVF521: Practical Techniques for VSAT Professionals
- GVF561: Fundamentals for Marine VSAT Operators
