Services and Solutions

FUTURE PROOF SATELLITE-ENABLED NETWORK INFRASTRUCTURE

At SES Networks, we empower you to make the most of your opportunities. Together we drive bigger, more fulfilling and more productive outcomes. We tailor industry-focused network and communication services and solutions powered by our MEO and GEO satellite solutions delivered by our fleet of MEO satellites powered by O3b, and our fleet of GEO satellites and, and extensive ground infrastructure to help you best maximise opportunities.

CONNECT SERVICES
Connectivity Your Way

SES Networks services and solutions are underpinned by a rock solid, next-gen global infrastructure comprised of MEO and GEO satellite fleets, extensive fiber in the ground, advanced gateways and teleports, established interconnection and peering agreements, mobility assets, and unmatched satellite and network expertise. Enable high-performance consumer and business fixed and mobile broadband services; 2G, 3G and 4G/LTE cellular backhaul; trunking; and low-latency internet, cloud and private data network connectivity and communications services.

NETWORK SERVICES
Intelligent, Application-Adaptive Connectivity

Network Services deliver an exceptionally high quality of experience whether end-users are accessing popular internet content and entertainment services, or using cloud and mobile business and consumer applications (social media, VoIP, VoLTE, and ViLTE, etc.) on the ground, in the air, or at sea. Whether customers need a simple IP or Ethernet connection, VPN, or broadband connectivity for a fleet of ships or airplanes, or a more cost-effective 4G or LTE backhaul solution with GEO diversity, Network Services are available anywhere.

ENGAGEMENT SERVICES
Partnering for Transformational Change

The SES Networks team actively engages with customers, working hand in hand to guarantee the success of their digital businesses. IT consulting & professional services offered through our Customer Enablement Practice (CEP) help customers tailor and fine tune their network and communication solutions to make the most of every growth opportunity. From network traffic audits and performance optimisation to actionable insights based on cross-ecosystem data analysis, we help customers produce positive business outcomes at every turn.

APPLICATION SERVICES
Optimise Applications for Superior Quality of Experience

SES Networks offers end-to-end managed Application Services to optimise the performance of over-the-top (OTT) business and consumer applications delivered from the cloud and mobile edge network endpoints. Continually optimised network performance is the best way to ensure end customers have a consistently high Quality of Experience (QoE) every time they connect to chat, text, or use their favorite social media, stream entertainment, or use bandwidth-intensive productivity applications.

LIFECYCLE SERVICES
### Focus on Your Core Business

SES Networks' Lifecycle Services include service delivery, training and full lifecycle support for your services from start to finish. Our customers have the option of outsourcing the network 100%, allowing them to be wholly focused on growing their core business. Having SES Networks provide full lifecycle services allows customers to transfer risk and self-provision resources, paying only for what they use as they need it.

MARKET-FOCUSED SOLUTIONS
Purpose-Built for Better Results

Our proven fixed, mobility and vertically focused network and communications solutions help customers differentiate services, expand market reach, and deliver operational efficiencies. We turn market- and mission-specific challenges into positive results. Ask SES Networks how our satellite and terrestrial solution experts can design and manage the perfect solution for your business.
