SES's First Two O3b mPOWER Satellites Arrive at Cape Canaveral

SES's most high-performance satellite system will start launching next week

Luxembourg, 6 December 2022 – SES's first two O3b mPOWER satellites [were delivered to Cape Canaveral last weekend](#) and are scheduled for launch on a SpaceX Falcon 9 rocket mid-December. The O3b mPOWER satellites are part of SES's second-generation medium earth orbit (MEO) system operating at approximately 8,000 km away from the Earth's surface, and will deliver high-performance connectivity services to enterprises and governments around the world.

The innovative O3b mPOWER ecosystem comprises an extensive ground infrastructure of eight ground stations strategically located around the world, dozens of software service providers, platform and customer terminal partners, as well as an initial constellation of 11 Boeing-built satellites.

With a scheduled start-of-service date in Q3 2023 with only six satellites, O3b mPOWER will offer the highest, most flexible throughput, roundtrip latency of less than 150 milliseconds and uncontended service options, backed by guaranteed service-level agreements.

Visit the [newsroom](#) to learn more about how O3b mPOWER can bring a new level of performance to satellite-enabled communications.

About SES

SES has a bold vision to deliver amazing experiences everywhere on earth by distributing the highest quality video content and providing seamless connectivity around the world. As the leader in global content connectivity solutions, SES operates the world's only multi-orbit constellation of satellites with the unique combination of global coverage and high performance, including the commercially-proven, low-latency Medium Earth Orbit O3b system. By leveraging a vast and intelligent, cloud-enabled network, SES is able to deliver high-quality connectivity solutions anywhere on land, at sea or in the air, and is a trusted partner to the world's leading telecommunications companies, mobile network operators, governments, connectivity and cloud service providers, broadcasters, video platform operators and content owners. SES's video network carries about 8,000 channels and has an unparalleled reach of 366 million households, delivering managed media services for both linear and non-linear content. The company is listed on Paris and Luxembourg stock exchanges (Ticker: SESG). Further information is available at: www.ses.com.
