

O3b mPOWER GOVERNMENT SERVICES

O3b **mPOWER**

PERFORMANCE ABOVE ALL

ENABLE MISSION SUCCESS ANYWHERE

Governments worldwide look to commercial satellite services to meet mission-critical networking needs—at fixed sites or mobile locations on land, at sea, or in the air. Mission success increasingly relies on advanced digital technologies—including high-resolution intelligence gathering and video communications. When predictable performance matters, and contention is not an option, only O3b mPOWER provides high-throughput, low-latency, resilient, and secure commercial satellite communications. Unmatched committed information rates (CIR) enable defence agencies to meet demanding operational

requirements. With unprecedented performance, flexibility, and scale, O3b mPOWER seamlessly delivers the time-sensitive information government organisations need to make better decisions faster. For operations where security and enhanced control is paramount, only O3b mPOWER's Sovereign Services support government-preferred waveforms, and connect directly to government gateways. O3b mPOWER Managed Services also offer Naval and Fixed Enterprise operations the same high-performance connectivity via SES-owned and operated gateways.

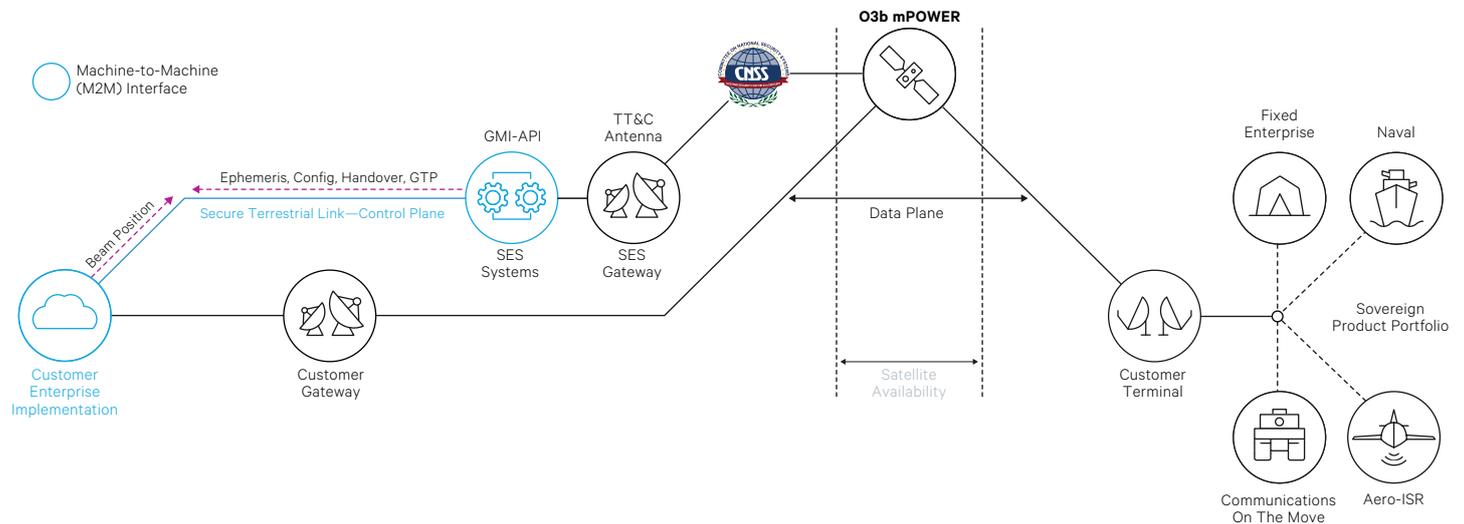

MAXIMISING GOVERNMENT CONTROL WITH SOVEREIGN SERVICES

Unparalleled performance, operational flexibility, and system scale—with enhanced government control

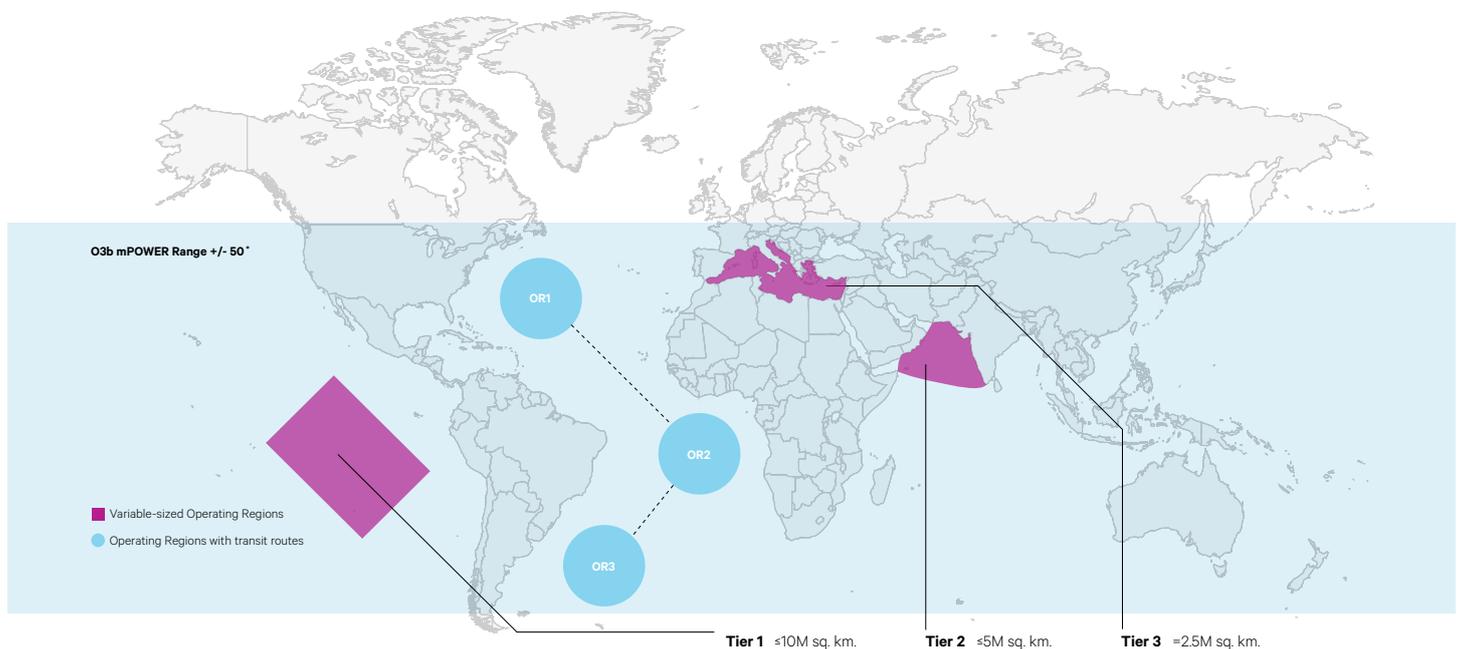

O3b mPOWER Sovereign Services enable governments to maximise sovereign control, reliability, and security while operating on a commercial satellite system. Traffic is routed through a private satellite connection and lands at a government-secure gateway. The open architecture of O3b mPOWER enables customer-preferred hardware solutions and tactical waveforms, and allows standard military encryption, including high assurance internet protocol encryptor (HAiPE) devices.

Sovereign Services deliver low-latency, high-throughput connectivity to users in fixed or mobile locations. Fully digital payloads enable flexible bandwidth allocation when and where it's needed. Steerable, secure beams with location obfuscation enhance mission security by minimising the probability of Naval and Aero-ISR asset detection. Inherent anti-jam features and resiliency are a hallmark of O3b mPOWER, which operates in Medium Earth Orbit (MEO). Sovereign Services provide unmatched security, resilience, and control for managing mission-critical data.

Sovereign Services network architecture

Operating Region (OR) examples

ENABLING HIGH-PERFORMANCE OPERATIONS WITH MANAGED SERVICES

1.5Gbps

to a single ship or to a remote land-based location or forward operating base

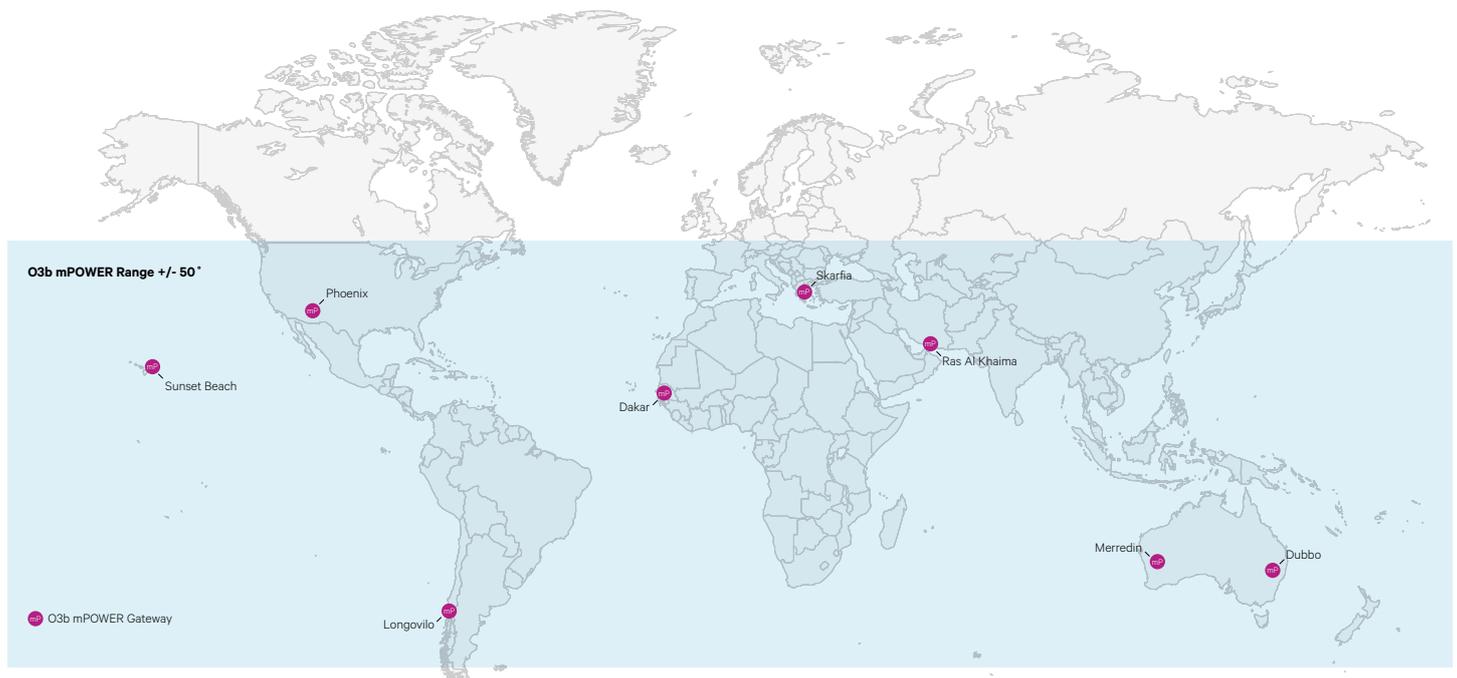

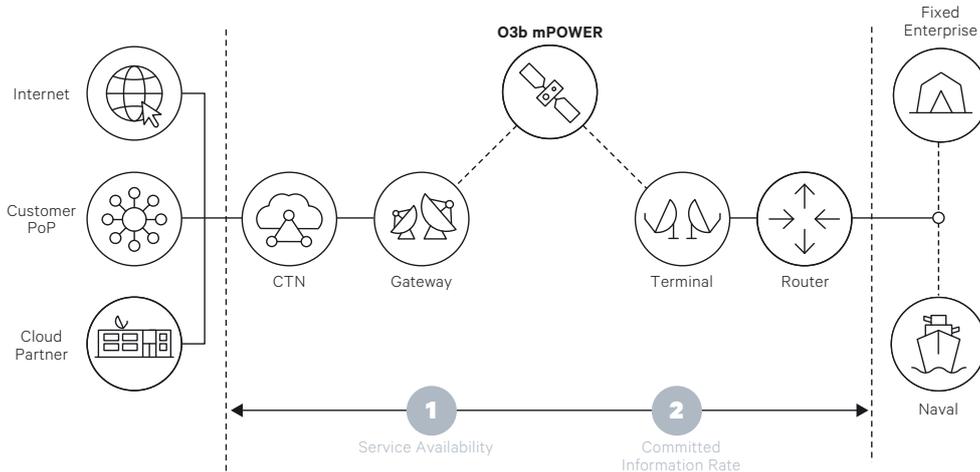

O3b mPOWER Managed Services provide unparalleled high-performance, enterprise-level network solutions—fully managed and supported by SES.

Government customers can leverage uncontended high-throughput, low-latency connectivity up to 1.5Gbps to a single ship or to a remote land-based location or forward operating base. With Managed Services, defence, space, and civil agencies can access a full range of operational, logistical, and back-office applications with predictable quality of service. Manage high-volume mission-critical data

transmissions, video briefings, and surveillance information—with enough bandwidth to support personnel morale, welfare, and recreation (MWR) programmes. Our fully managed and supported service also enables private, dedicated connectivity to top-tier cloud service providers.

O3b mPOWER Managed Services easily scale to enable a range of new use cases—from mission-critical communications for small mobile teams at the tactical edge, to more robust MWR services and full regional fibre restoration.

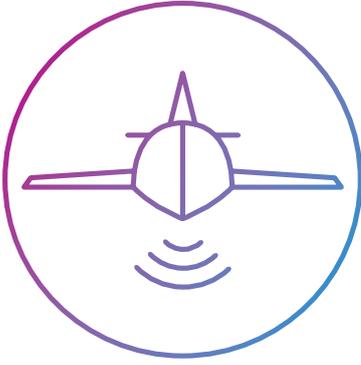

Managed Services network architecture

OUR GOVERNMENT SERVICES PORTFOLIO

Setting a new benchmark for government network performance, scale, and control through O3b mPOWER.

SOVEREIGN AERO-ISR mPOWERED

Unprecedented high-performance and secure network services with unmatched return link throughput unlock the power of multiple high-definition sensors operating at full capacity from a single ISR platform. With low latency provided by

O3b mPOWER, government organisations can command unmanned aircraft, provide operational and navigational data to manned missions, and transmit ISR data in real time to central command centres in any chosen location.

TECHNICAL SPECIFICATIONS

The Sovereign Aero-ISR mPOWERED service is available in three packages—Tier 1, Tier 2, and Tier 3.

Constellation	O3b mPOWER		
Satellite availability SLA	99.5%		
Gateway	Sovereign government gateway		
Terminal options	<p>Tier 1</p> <p>Option 1 Customer-selected SES-certified modems and terminals</p> <p>Option 2 SES-provided 12" (30cm), 18" (46cm), or 9.8" x 10.6" (25cm x 27cm) terminal and modem or micromodem, one-time payment</p> <p>Option 3 SES-provided 12" (30cm), 18" (46cm), or 9.8" x 10.6" (25cm x 27cm) terminal and modem or micromodem, payment plan included in MRC</p>	<p>Tier 2</p> <p>Option 1 Customer-selected SES-certified modems and terminals</p> <p>Option 2 SES-provided 12" (30cm), 18" (46cm), 9.8" x 10.6" (25cm x 27cm), or 9.8" x 5.3" (25cm x 13.5cm) terminal and modem or micromodem, one-time payment</p> <p>Option 3 SES-provided 12" (30cm), 18" (46cm), 9.8" x 10.6" (25cm x 27cm), or 9.8" x 5.3" (25cm x 13.5cm) terminal and modem or micromodem, payment plan included in MRC</p>	<p>Tier 3</p> <p>Option 1 Customer-selected SES-certified modems and terminals</p> <p>Option 2 SES-provided 9.8" x 5.3" (25cm x 13cm), or 5" x 5.3" (13cm x 13.5cm) terminal and modem or micromodem, one-time payment</p> <p>Option 3 SES-provided 9.8" x 5.3" (25cm x 13cm), or 5" x 5.3" (13cm x 13.5cm) terminal and modem or micromodem, payment plan included in MRC</p>
Antenna/BUC	25W, 20W	25W, 20W	8W or 25W
Capacity packages	<p>Option 1 FWD: 512Kbps RTN: ≤10Mbps</p> <p>Option 2 FWD: 1Mbps RTN: ≤25Mbps</p> <p>Option 3 FWD: 1Mbps RTN: ≤45Mbps</p>	<p>Option 1 FWD: 512Kbps RTN: ≤10Mbps</p> <p>Option 2 FWD: 1Mbps RTN: ≤25Mbps</p> <p>Option 3 FWD: 5Mbps RTN: ≤25Mbps</p>	<p>Option 1 FWD: 512Kbps RTN: ≤3Mbps</p> <p>Option 2 FWD: 512Kbps RTN: ≤6Mbps</p>
Coverage Within +/- 50° latitude	<p>Option 1 Regional service within customer-defined operating region (OR) with radius ≤1,500km</p> <p>Option 2 Field of view (no intra-gateway roaming)</p>	<p>Option 1 Regional service within customer-defined OR with radius ≤900km</p> <p>Option 2 Field of view (no intra-gateway roaming)</p>	<p>Option 1 Regional service within customer-defined OR with radius ≤300km</p>

SOVEREIGN NAVAL mPOWERED

Industry-best bandwidth scaling, low-latency performance, and ironclad resilience enabled by O3b mPOWER establish an entirely new standard for ship connectivity worldwide. Government-controlled

steerable, secure beams with location obfuscation minimise the probability of detection by adversaries, protect personnel and valuable assets, and enable increasingly data-informed operations.

TECHNICAL SPECIFICATIONS

The Sovereign Naval mPOWERED service is available in three packages—Tier 1 (up to 1.5Gbps per ship), Tier 2 (up to 500Mbps per ship), and Tier 3 (up to 100Mbps per ship).

Constellation	O3b mPOWER		
Satellite availability SLA	99.5%		
Gateway	Sovereign government gateway		
Terminal options	Tier 1 Option 1 Customer-selected SES-certified modems and terminals Option 2 2.4m terminal and/or SES-provided modem, one-time payment Option 3 2.4m terminal and/or SES-provided modem, payment plan included in MRC	Tier 2 Option 1 Customer-selected SES-certified modems and terminals Option 2 1.3m terminal and/or SES-provided modem, one-time payment Option 3 1.3m terminal and/or SES-provided modem, payment plan included in MRC	Tier 3 Option 1 Customer-selected SES-certified modems and terminals Option 2 0.85m terminal and/or SES-provided modem, one-time payment Option 3 0.85m terminal and/or SES-provided modem, payment plan included in MRC
Antenna/BUC	2.4m/40W	1.3m/20W	0.85m/20W
Capacity packages	Option 1 Pre-defined operating region (OR): <ul style="list-style-type: none"> • 500Mbps – 1,500Mbps • 100Mbps increments Option 2 Global service for transit between ORs (within MEO coverage): <ul style="list-style-type: none"> • 45Mbps (2:1) 	Option 1 Pre-defined OR: <ul style="list-style-type: none"> • 100Mbps – 500Mbps • 50Mbps increments Option 2 Global service for transit between ORs (within MEO coverage): <ul style="list-style-type: none"> • 45Mbps (2:1) 	Option 1 Pre-defined OR: <ul style="list-style-type: none"> • 100Mbps
Link agility	FWD/RTN ratios of 4:1, 3:1, or 2:1	FWD/RTN ratios of 4:1, 3:1, or 2:1	FWD/RTN ratio of 2:1
Coverage <small>Within +/- 50° latitude</small>	Regional service within customer-defined OR ≤10M sq. km Options for 2.5M, 5M, or 10M sq. km	Regional service within customer-defined OR ≤5M sq. km Options for 2.5M or 5M sq. km	Regional service within customer-defined OR = 2.5M sq. km
Number of ships	Per-ship service (up to eight ships can be assigned to a beam, but only one can use it at a time)		

SOVEREIGN FIXED ENTERPRISE mPOWERED

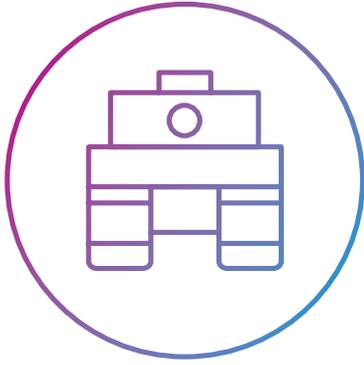

Unmatched high-throughput, low-latency, and secure network services optimised for use cases on land. From mission-critical data transfers to video conferencing and MWR for personnel, only O3b mPOWER offers the scale needed

to provide fibre-like services in remote locations. Integration with government gateways and secure private networks maximises data security. Transportable ground terminals enable network deployment or reconstitution within days.

TECHNICAL SPECIFICATIONS

The Sovereign Fixed Enterprise mPOWERED service is available in two packages: Tier 2 (up to 1.5Gbps), and Tier 3 (up to 700Mbps).

Constellation	O3b mPOWER		
Satellite availability SLA	99.5%		
Gateway	Sovereign government gateway		
Terminal options	Tier 1	Tier 2	Tier 3
	Not available at O3b mPOWER start of service	Option 1 Customer-selected SES-certified modems and terminals Option 2 SES-provided 2.4m terminal, one-time payment Option 3 SES-provided 2.4m terminal, payment plan included in MRC	Option 1 Customer-selected SES-certified modems and terminals Option 2 SES-provided 1.3m or 1.2m terminal, one-time payment Option 3 SES-provided 1.3m or 1.2m terminal, payment plan included in MRC
Antenna/BUC	N/A	2.4m/40W	1.2m or 1.3m/20W or 40W
Capacity packages	N/A	FWD: ≤1,000Mbps RTN: ≤500Mbps	FWD: ≤500Mbps RTN: ≤200Mbps
Link agility	Customers can choose from FWD/RTN ratios of 3:1, 2:1, 1:1, 1:2, or 1:3		
Link reconfigurability	Monthly changes in demand to flex with operational needs		
Coverage <small>Within +/- 50° latitude</small>	Regional service within customer-defined service area		
O3b mPOWER HW compatibility certification	Customer sponsorship; vendor action		
API integration	Customer sponsorship; vendor action		
Beam portability <small>Within region</small>	Option 1: None (static)	Option 2: Two weeks notice	Option 3: 72 hours notice

SOVEREIGN COTM mPOWERED

Take the command post to the field with high-throughput, low-latency, secure data services for mobile land-based operations. Access high-quality mission-critical operational and navigational data, and videoconferencing while on the move.

Sovereign COTM mPOWERED can be implemented onboard different-sized vehicles to support a wide range of scenarios—from military mobile command posts and surveillance to humanitarian responses.

TECHNICAL SPECIFICATIONS

The Sovereign COTM mPOWERED service provides up to 20Mbps throughput with several options which may be mixed and matched to meet our customer's specific requirements.

Constellation	O3b mPOWER		
Satellite availability SLA	99.5%		
Gateway	Sovereign government gateway		
Terminal options	<p>Option 1 Customer-selected SES-certified modems and terminals</p> <p>Option 2 SES-provided 9.8" x 10.6" (25cm x 27cm), or 19.7" x 5.3" (50cm x 13.5cm) terminal with modem, one-time payment</p> <p>Option 3 SES-provided 9.8" x 10.6" (25cm x 27cm), or 19.7" x 5.3" (50cm x 13.5cm) terminal with modem, payment plan included in MRC</p>		
Antenna/BUC	9.8" (25cm)/25W		
Capacity packages	<p>FWD: ≤10Mbps</p> <p>RTN: ≤10Mbps</p>		
Link agility	Customers can choose from FWD/RTN ratios of 3:1, 2:1, 1:1, 1:2, or 1:3		
Link reconfigurability	Monthly changes in demand to flex with operational needs		
Coverage Within +/- 50° latitude	Regional service within customer-defined service area		
Beam portability Within region	Option 1: None (static)	Option 2: Two weeks notice ¹	Option 3: 72 hours notice ¹

¹Portability request must go through an asset management review to ensure system resource availability.

MANAGED FIXED ENTERPRISE mPOWERED

Ultra-high-throughput, low-latency, and secure data services support a broad range of use cases. Manage mission-critical data, including massive amounts of IoT and sensor information, run HD video conferences, and retain enough bandwidth to enable MWR services.

Managed Fixed Enterprise mPOWERED is the market's only satellite solution that can deliver up to 1.5Gbps of total throughput to a single terminal, and enable private, dedicated connectivity to top-tier cloud service providers.

TECHNICAL SPECIFICATIONS

Constellation	O3b mPOWER			
Service availability SLA	99.5%			
Satellite latency SLA	≤150ms RTT			
Gateway	SES-managed gateway			
Terminal options	Tier 1	Tier 2	Tier 3	Tier 4
	Not available at O3b mPOWER start of service	Option 1 SES-provided 2.4m terminal, one-time payment Option 2 Same equipment as above, payment plan included in MRC ¹	Option 1 SES-provided 1.2 or 1.3m terminal, one-time payment Option 2 Same equipment as above, payment plan included in MRC ¹	Not available at O3b mPOWER start of service
Antenna/BUC	N/A	2.4m/40W	1.2m or 1.3m/ 20W or 40W	N/A
Capacity packages	N/A	FWD: ≤1,000Mbps RTN²: ≤500Mbps	FWD: ≤500Mbps RTN²: ≤200Mbps	N/A
Link agility	Ability to choose symmetrical or asymmetrical link ratios (4:1, 3:1, 2:1, 1:1 or 1:4, 1:3, 1:2)			
Link reconfigurability	Option 1: None		Option 2: Monthly	
Coverage Within +/- 50° latitude	Regional service within customer-defined service area			
Beam portability³ Within region	Option 1: None (static)		Option 2: Two weeks notice	Option 3: 72 hours notice
System management NOC	<ul style="list-style-type: none"> 24x7 monitoring End-to-end case and fault management 		<ul style="list-style-type: none"> Fault identification and alarm handling Fault triage, isolation, troubleshooting, and resolution 	
Internet connection	Option 1 – Not available		Option 2 – Available, flex handoff: <ul style="list-style-type: none"> Connect to the default SES On-net PoP Connect to On-net, Off-net, on-premises, or direct-to-cloud PoP 	
Terms and conditions	One base year, plus option years (with standard gov early termination)			
Billing	MRC based on CIR; non-contended service			

¹In Option 2, equipment is amortised over the base years of the original contract. Once the contract is complete, the customer retains complete ownership of the equipment. If the customer chooses to renew the contract, the MRC is updated to no longer include equipment costs.

²Based on link budget, SES can provide higher throughput, if necessary, based on requirements.

³Ability to port links and capacity across the customer's network within the region.

MANAGED NAVAL mPOWERED

Enable operational systems, advanced logistics tools, and quality of life applications at sea. Land traffic at SES gateways, and manage uncontended bandwidth up to 1.5Gbps for a predefined operational region. Optional link portability allows organisations

to define and move to new operational regions and access uncontended 45Mbps connectivity during the transit in between. Private, dedicated connectivity to top-tier cloud service providers is available using SES Cloud Direct.

TECHNICAL SPECIFICATIONS

Unified customer portal	Included		
Unified API	Included		
Cloud Direct	Option 1: Not available	Option 2: Available	
Internet connection	Option 1: Not available	Option 2: Available	
Terms and conditions	Option 1: One base year, plus option years (with standard gov early termination) Option 2: Five years (no early termination)		
Billing	MRC per ship		

¹ Equipment is amortised over the base years of the original contract. Once the contract is complete, the customer retains complete ownership of the equipment. If the customer chooses to renew the contract, the MRC is updated to no longer include equipment costs.

² Higher throughputs on the RTN link will require a 40W transceiver for MEO connectivity.

³ Customers must provide at least a 72 hours ANP prior to the date of when the ported OR is needed for service. Portability request subject to Asset Management review process to ensure system resource availability.
