

FlexMaritime Vantage

Reliable, high-speed connectivity for maritime vessels

Network speeds up to 60 Mbps download and 6 Mbps upload where FlexMaritime Service is offered

Available for existing and newly qualified 60cm+ antennas

Complements existing FlexMaritime global service with higher-speed coverage in high-traffic areas

Powered by SES's high-throughput, secure satellite network with global PoPs and fiber infrastructure

Offered exclusively through SES's qualified solutions partners

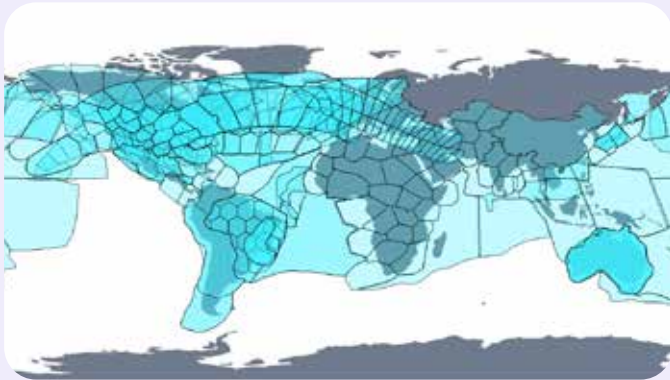

Higher Speeds to Meet Greater Demand

The commercial maritime industry is changing rapidly, accelerated by trends in decarbonization, internet-of-things (IoT), cybersecurity, AI, robotics, remote training, and crew welfare. To address these industry pressures, companies and operators in merchant shipping and commercial fishing are expanding their digitalization strategies to include advanced satellite connectivity services that can support fluctuating throughput demands, ensuring shore-like connections for vessels and crews at sea, often for long periods of time. FlexMaritime Vantage complements

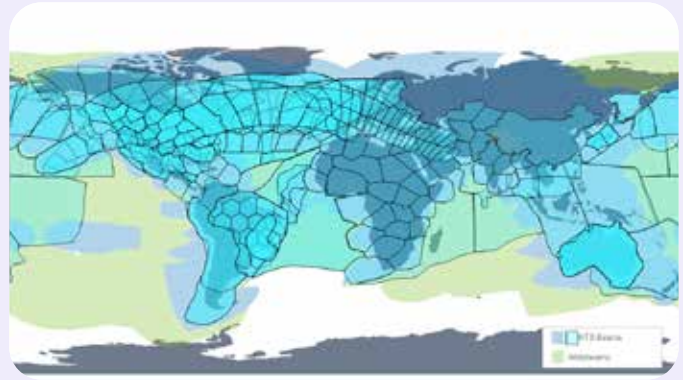

SES's flagship FlexMaritime service by adding a layer of higher speed coverage in high-traffic areas, enabling network connectivity speeds up to 60 Mbps download and 6 Mbps upload.*

FlexMaritime Vantage High-speed Multi-layered Coverage

Combined FlexMaritime Services Multi-layered Coverage

The Reliability of FlexMaritime with Higher Speed Connectivity

FlexMaritime Vantage is complementary to SES's award-winning FlexMaritime service.

By integrating FlexMaritime Vantage with FlexMaritime, merchant shipping and commercial fishing owners and operators equip their vessels and crew with reliable high-throughput ship-to-shore communications along with the added benefit of higher speed connectivity in high demand traffic routes.

Enables High-bandwidth Applications in Real Time

- **Artificial Intelligence:** Predictive maintenance, autonomous navigation, route optimization
- **Maritime Decarbonization:** Emissions tracking to improve fuel efficiency and support ESG compliance
- **Maritime Robotics:** To address worker shortages and crew safety

- **Maritime IoT:** Visibility into processes and continuous tracking and monitoring to identify bottlenecks and avoid downtime
- **Cybersecurity:** Countering malicious hackers of networks and connected devices
- **Remote Education and Training:** Mixed media supporting task specific training plus information during maintenance operations

Offered Exclusively Through SES's Solutions Partners

FlexMaritime Vantage can be seamlessly integrated with innovative value-added services and world-class support to create the right solution to meet unique business needs.
