# Bringing the world closer to the moment.

SES and the IJF Partnership

15+  
years

Volume of content orchestrated  
in SES SCORE

300K  
hours

Global reach

100+

countries

From the intensity of the World Championships to events across four continents, judo runs on precision. Every throw, every landing, every score depends on capturing the action exactly as it happens—and delivering it instantly to audiences worldwide.

The International Judo Federation (IJF) runs a global tour of more than 20 events each year. Each competition takes place in a different country, with different conditions, teams, and technical environments. No two events look the same.

Every event must deliver flawless, live coverage.

## The challenge ahead

Delivering judo is not a single broadcast. It is a continuous, global operation.

Each event introduces new variables:

- **Location:** Events move across

continents, each with different infrastructure and conditions

- **Logistics:** Crews, equipment, and workflows must reset quickly between events
- **Production complexity:** Up to 16 cameras per tatami capture every angle required for scoring and replay
- **Precision:** Officials rely on exact views to judge outcomes
- **Timing:** Production teams make real-time decisions with no margin for delay

There is no reset. No second attempt. If the moment isn't captured and delivered perfectly, it's gone.

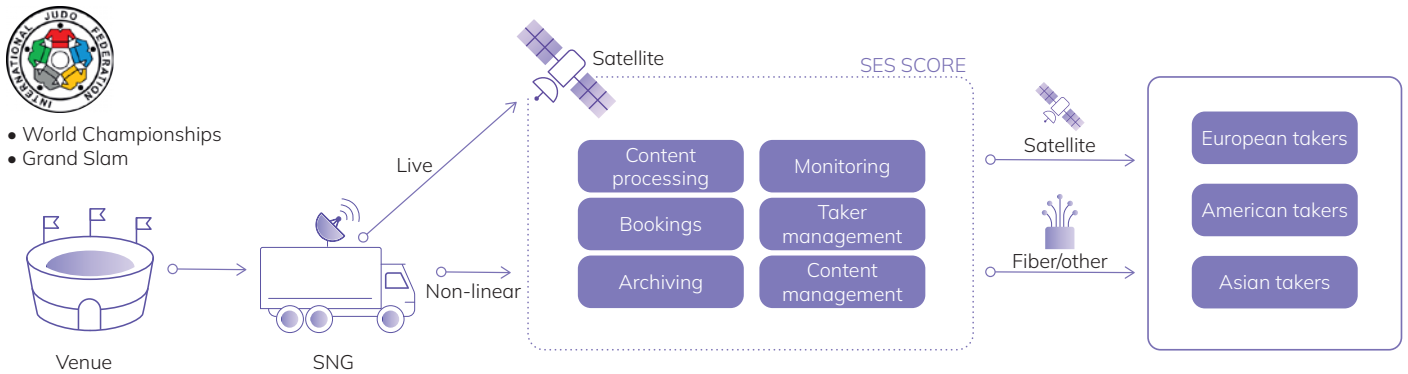

## The SES solution

SES delivers the infrastructure that carries every match from the tatami to a global audience—live and without interruption.

We deliver live feeds from each venue through our global teleport network, and distribute them to broadcasters

worldwide. Reaching audiences in more than 100 countries, SES ensures consistent, high-quality coverage wherever events take place. Our combined GEO and MEO capacity creates a hybrid, multi-orbit network, maintaining consistent performance across locations regardless of local conditions.

Beyond live delivery, SES supports IJF’s full content workflow through the SES SCORE platform. The system ingests, stores, and organizes more than 300,000 hours of content in a single, secure environment. Broadcasters can access, edit, and distribute material quickly — extending the value of every match.

From capture to global distribution, SES ensures every moment reaches its audience.

## Partnership in action

SES and IJF have worked together for more than 15 years with a clear division of roles. IJF drives the sport—developing competitions, producing events, and shaping the viewing experience. SES delivers every moment to the world, managing contribution, distribution, and global reach.

Clarity removes friction. Production teams focus on capturing the sport. SES ensures delivery performs—every time, in every location.

As the IJF World Tour moves from country to country, this partnership keeps performance consistent, regardless of the environment.

## What this makes possible

When delivery holds firmly and reliably, the focus stays on the sport.

Fans see every angle, every call, and every defining moment. Broadcasters receive content they can trust, ensuring audiences follow the tour from anywhere in the world.

That reach drives consistent, measurable, and sustainable growth by securing more visibility and engagement. More people are connected to the sport, because in judo, the moment decides everything.

And when that critical moment reaches the world, the sport grows.

“As a TV Director, I know that with SES we can start the live broadcast, and we will have seamless coverage everywhere. We know we’re in safe hands. That’s how we grow and get more eyes on judo.”

**Jack Willingham,**  
TV Director, International Judo Federation
